£43,000 per annum pro-rata. Part time 2.5 days per week.

12 month fixed term contract. (Option for 6 months extension subject to achievement of targets and continued funding)

Temporary position with flexible and home working.

Home working payment of £750 annum, other expenses negotiable.

Part based at Art Gene, Bath Street Barrow-in-Furness, Cumbria. LA14 5TY

Art Gene are seeking are seeking a **Low Carbon Grants Lead**, to join our award-winning team.

The successful candidate will lead on the development and delivery of Low Carbon Barrow Grants Programme, part of the UK ESIF Funded and Cumbria LEP funded Low Carbon Barrow project. The role is based at Art Gene's premises in Barrow and will involve close working with the project and finance team at Barrow Borough Council who are the accountable body for the funds.

Low Carbon Barrow is a partnership project, delivered jointly by Art Gene and Barrow Borough Council. The programme consists of a range of demonstration projects including electric vehicle charge points, low carbon investments in public buildings and social housing as well as a mobile low carbon demonstration project, Bug-Out, designed and delivered by Art Gene's Artist Directors.

The Low Carbon Grants programme has £225,000 to invest in low carbon projects across Barrow-in-Furness. The aim of the programme is to reach 'everyday' locations across the area to showcase the value and benefit of investments in low carbon technology, both for the financial and environmental benefits.

The successful candidate will work to promote the opportunity across stakeholders in the area and manage the Low Carbon Grants process. This involves:

Step 1 – Confirming the applicant meets the criteria for receiving a grant and their status with respect to Eligibility Rules

Step 2 – Inviting an Expression of Interest, to confirm that the project meets the criteria for a Low Carbon Barrow demonstration project

Step 3 – Inviting a Project Application

Step 4 – Undertaking an assessment of the project and where applicable, present the application to appraisal

Step 5 – Supporting the applicant to procure and deliver against the grant conditions. Monitor progress and manage risk to the Low Carbon Barrow programme.

This role, will be undertaken by an individual who:

- Is passionate about the environment, climate issues, sustainability, and engaging people in understanding and making changes in their lives to reduce carbon, and who
- Has an eye for detail and understanding of public sector-based project management processes.

They will work within a collaborative team led by Art Gene’s Artist Directors, and closely with Art Gene’s Arts Project and Social Media Manager. They will also work closely with new roles (to be appointed) of Environmental Engagement Manager and Art Gene Development Director, and with our wider creative teams which include freelance associate artists, designers, architects, ecologists and other specialists, and Art Gene’s core administrative and support staff.

Bespoke training will be provided by Art Gene and Barrow Borough Council as needed. The role will be further supported by our local trustees and supporters who have extensive knowledge of the islands, their urban landscapes, local heritage, and the communities who live across them, from many different perspectives.

The role is central to Art Gene’s approach to **REAL BARROW** in delivering visionary projects that engage people in the **social, natural and built environment**, projects that are ethical, sustainable and address issues around the environment. This role will contribute to the case for environmentally friendly infrastructure and placemaking, landscape scale environmental improvements which will have benefits, for climate and social change and have impacts on improved health, well-being, and the reduction of carbon emissions in the area.

This challenging and rewarding position will build on and facilitate Art Gene’s existing partnerships with, individuals and communities locally and regionally - uncovering and developing aspiration for social change at a grass roots level.
